Art. 3. To hear and act on the report of the committee on school accommodation and transportation of school children.

Transportation by E. F. Richardson for the committee. Recommend transportation be continued as in the past. Transportation to the north end the year around.

Report of the committee on extra school accommodations.

The school sessions in the centre of the town are held in five school rooms; two good sized and two small school rooms in the Adams building and one in this building.

The room in this building which is ill-shaped for a school room, and which under no circumstances should contain over thirty pupils, has during the last year had 55 pupils and two teachers.

The two smaller rooms in the Adams building have at times been over-crowded and the outlook at the present indicates very unsatisfactory conditions in both room.

We would, therefore, recommend the building of a four-room school building as the most satisfactory solution of this problem.

The erection of such building will provide ample accommodation for the present, and for some time in the future, and can we believe be erected and furnished for less than \$15,000.00.

Respectfully,

E. F. RICHARDSON,

M. J. WEST.

We, the undersigned, registered voters of Middlesex, Mass., represent that we have reason to believe that the returns of the election officers of said ward or town, of the votes cast at the election on Nov. 5, 1912, for treasurer, auditor and attorney general, are erroneous in this respect:

That Elmer A. Stevens, John F. White, and James M. Swift, candidates respectively for treasurer, auditor and attorney general, were credited with more, and Joseph L. L. St. Coeur, James F. Carens, and George W. Anderson, can-

didates for the same office, with less votes that were actually cast for them.

We believe a recount of the votes cast in our said town will effect the election of one or more of those candidates at said election.

We therefore ask that the votes cast for Elmer A. Stevens, John E. White, James M. Switt, Joseph L. P. St. Coeur, James F. Carens and George W. Anderson, as afore said be recounted.

Chapter 12 Miscellaneous Provisions.

We defended suit brought against the town by Mrs. Mary Holly for care of T. L. Fiske, and the case was tried in Dedham in December, 1912, and resulted in a disagreement of the jury.

The case has been entered again for the present term, and we expect it to be tried soon.

We have defended suit brought against the town by the City of Boston for aid to the Boris Thorner family, and this case has not yet been tried.

The Frink case has been argued before the Supreme Court, but no decision has yet been given.

We have on hand unpaid bills to the amount of \$63.57, besides which are our lawyer's bills, and also the bills we will have to pay if the courts decide against the town.

We recommend an appropriation of \$1200.00 for the coming year.

REPORT OF THE ELM LEAF BEETLE SUPERINTENDENT.

To the Honorable Board of Selectmen

The elms in the town highways have been sprayed with arsenic of lead and are in good condition.

I found it necessary to spray other town shade trees which was infested with caterpillars and stripping the trees.

I should recommend \$200.00 to be appropriated for spraying elms and other town shade trees.

I recommend the town to sell the gas spraying machine and purchase a gasoline sprayer, as it is very much more economical to town to operate. For if the state passes the new law this year to put the elm leaf beetle, leopard moth and the San Jose scale in the same class as the gypsy moth then a different sprayer is assential to the town's welfare.

E. W. STAFFORD,

Superintendent.

REPORT OF THE GYPSY MOTH SUPERINTENDENT.

To the Honorable Board of Selectmen, Millis, Mass.

I herewith submit the annual report of the gypsy and brown tail moth work.

In so much as Millis is in the gypsy moth quarantined district of the state and is under quarantine. The conditions of the town are good as there are only three large infestations in town, and they are under good control and well looked after, so they will not spread.

The very dry season last summer was a very bad handicap to the wilt disease, and the result was not what was expected of it here in town. The brown tail fungus has been liberal distributed through the town, and has done good work in helping to keep down the brown tail moths.

All the brown tail moth nests which the owners have failed to cut, are being cut and destroyed and the outlook for the coming year is very good.

Local Superintendent

Last year under the item of temporary repairs, the painting of the Adams schoolhouse was projected. In consideration of the general condition of the schoolhouse, and the fact that the schoolhouse is in such a poor condition that it is necessary to defer the painting, the amount of \$123.48.

In accordance with the policy of the State Police, requiring exit signs for halls to the street, a new fire alarm, fire escapes, and improved door lockers, the unexpended balance is somewhat less than would have been otherwise.

The immediate need of larger and improved school facilities is no longer a theory, but a fact. An inspection of the State Police Department has recently ordered extensive

ranges and rape victims both at the Adams School and at Orange Hall. Some of these he has held in abeyance pending action by the town at its annual town meeting.

The toilet facilities at both schools are a disgrace; for which both are blamed frequently, the fault being in the country, if not in the school, or in rising complaint.

Our committee recommend either a new building or a thorough renovation, including sanitary lavatories and closets, or an addition to the Adams Schoolhouse to which at least two rooms with an adequate ventilation system for a whole building and new outside with flush toilet and drainage pipes.

SUPERINTENDENT'S REPORT.

To the School Committee of Millis.

I herewith submit my eleventh annual report of the public schools of this town.

The average membership on the public schools of Millis for the year ending in June, 1912 was, in whole numbers, 248, with an average attendance of 184, and a percentage of attendance of 74.18. The year closing in June, 1911 had an average membership of 240 with an average attendance of 220, or 91.67 per cent in attendance. Up to January 2, the closing of the average membership, in whole numbers, had been 242, with an average attendance of 248, or 102 per cent of the membership.

Although the attendance in percentage of attendance has not improved, and had a tendency of diminishing, for some time past, the cause is to call your attention to the increase in average membership. From 1901 to 1912 we have a large increase for the period of time but have not yet had the 240 was about the average of 1901 and 1902. If that were true, and that the only problem of this school has been made since, is the increase added to the school. In East Rockville, we can readily see that we have reached at the time when, if not all, of the school houses are overcrowded. A serious point to be considered in this problem is the unequal size of the houses of the school, also that the increase in number of children has come, in a marked degree, during the last two years, in the lower grades. This year the

greatest difficulty has come in the third and fourth grade room. For a time it was out of the question to put all of the children of those grades into that room, therefore the half-time plan was used until the removal from town of some of the children gave a chance to crowd the remainder in. Even now, with 47 children in a room intended to accommodate but 35, and with an imperfect system of ventilation, one must surely recognize that these conditions are not good for physical health or for mental progress. This room will be relieved somewhat next year, because the next third grade will be smaller. The fifth-sixth grade room will be crowded next year, but the most serious trouble will come at Grange Hall. There are 32 in the present first grade, and if as many apply for admission next September as usual, it is difficult to see how two grades can be placed there. Of course the half-time plan can be put into operation, or the school committee can rule out all under six, or possibly under seven years of age.

Since there is to be a special report in regard to school accommodations, at the annual town meeting, extended discussion is not necessary here, therefore your attention is simply called to the existing conditions in order that the town may provide a solution of the problem. It certainly seems that it should be settled in a way to make it unnecessary to wait for people to move from town in order to have room for the children in the schools.

Taking the foregoing facts into consideration, in connection with the supposition that Millis will continue to grow and prosper, it can be readily seen that our high school will soon be larger as these full grades are adding to the present size being due to small entering classes of the last two years.

The following table will furnish data of the number in the High School for each year, from ten years ago.

Grades of the school were increased this year
under the new curriculum.

Beside the established regular high class,

overcome, in a measure, the faulty results of the methods which were attempted previously by the regular teachers, who on account of a lack of specific knowledge of the value of drawing, were unable to have a practical trial. The pupils are now learning to use drawing as a means of expression, which is a valuable part of education.

The introduction of music supervision marked a distinct step in advance, and has made that subject an important factor in our school work. Early in February our supervisor of music is to leave us, to accept a position with a much more lucrative salary and with a different special line of music.

The plan whereby we secure expert instruction in music and drawing, and in the manual arts as also referred to, the room containing grades three and four taken care of, and additional assistance in the high school, all done by two teachers, is exceptional. This plan was set into operation in order to secure such service and at the same time have it cost the taxpayers little as possible.

I am finding it very difficult to find a teacher to execute this plan of work unless a supervisor is made of the subject, therefore it may be necessary to employ a special supervisor of music, as we are to keep that subject upon the present standard.

Our work along the lines of physical training is an advance not yet attempted by many small towns. Education in its broad sense must include physical development, and the ability to handle the body properly and to take a better care for and maintain its structure through life is certainly worthy of our attention.

Ten years ago, I found that a start had not been made to provide some books of literary merit supplementing the

the regular textbooks. Since then, this plan has been gradually extended, without sudden large cost, to include supplementary reading in literature, history, geography, civics and music. At the present time we are fairly well equipped.

The usual life of a book is about three years, but we are still using a good book that was less ten years ago. Every effort is made to keep down the expense of books and supplies, and as far as is true possible what is needed. Teachers are required to keep all books in good order, in order to keep them clean and to increase the length of time they can be used. Pupils are taught to use all school material with economy.

Recognizing the truth that the most essential for good books is competent teachers, the constant aim is to select teachers with training, and, if possible, with successful experience. Such teachers are always in demand, and consequently salaries, where we have been obliged to increase the salary item. We have hardly raised salaries enough to meet and with the increase in the cost of living. But it is gratifying to be able to hold some of our best teachers more than one or two years. We were able to fill successfully the vacancy caused by the resignation of last June.

The exhibition of pupils' work, made last spring, and shown throughout the summer with the exhibits of the pupils of the neighboring communities, have received many favorable comments. The interest taken seems to indicate that the introduction of manual work that would include a wider use of tools for the boys, and perhaps some domestic science for the girls, would receive public support. I recommend that we plan for the introduction of such work and put it in operation as soon as room can be obtained.

The State offers to aid approved vocational agricultural departments in high schools to the extent of two-thirds of the salary paid to the instructor. Pupils in such a department spend half time in school and half time in practical agricultural projects on the farms. I believe that Illinois is favorably located for such a department, and that students would be attracted to it from neighboring towns.

The interest in the penny saving system continues with the children, and the following is a statement of the amounts deposited up to January 1, 1912:

Commendation too freely expressed may sometimes produce wrong results, but I feel that the noble spirit which has been shown frequently by our present group of teachers deserves our thanks.

Personally, I know that the success of our schools is due in a large measure to the fidelity and loyalty of the teachers.

Respectfully submitted,

M. J. WEST,

Superintendent of Schools.

REPORT OF THE MUSIC DEPARTMENT.

Mr. M. J. West, Superintendent of Schools.

Dear Sir:—As supervisor of music in the schools of Millis, I submit my third annual report.

It has been the aim throughout the primary and grammar grades to give the children enough practical instruction to enable them to read music at sight from either staff, and enough cultural instruction to help them to understand what good music really is, and who the great composers are.

Music in the high school is, I admit, a problem. By this time the boys and girls can read, if not fluently, at least passably, and so no longer feel the interest in learning something new that stimulates the lower grades. The production of large works, such as oratorios and cantatas, which is naturally the next step, cannot be undertaken for lack of numbers. What, then, should be the aim of music in the high school? I should say cultural. Give high school pupils some knowledge of the history of music, of composers and singers past and present, of the greatest works, of the progress of music in our country to-day, so that all their lives they may feel an added interest and pleasure in this great art. By no means would I do away with chorus singing, but make it simply a part instead of the whole plan.

In choosing a teacher for the music, I would recommend that one be selected who could give her whole time to the town. From my own experience, I believe that a

teacher who thoroughly knows her pupils and whose pupils know her, can get better results than a teacher who only knows her pupils' faces. Then, too, a resident teacher can have an oversight of all music given in the name of the school; she can keep in touch with and help pupils in music studies at school, and so really help the community far more than a teacher who spends but one day a week in the school room.

In closing, I wish to thank the members of the school board, the superintendent, the teachers and the pupils for their best and loyal support during the past two and one-half years.

Respectfully submitted,

VALLEYN M. WARREN,

Supervisor of Music.

REPORT OF THE DRAWING AND INDUSTRIAL DEPARTMENT.

Mr. M. J. West, Superintendent of Schools.

Dear Sir:—The work of this department is being carried on much the same as in the past two years. The aim is to provide a course both practical and interesting, one that will inspire the pupils to do for themselves.

All the time given to drawing in the primary grades is well spent, and I would recommend, instead of three twenty-minute periods each week, that every day the same amount of time be devoted to work with the hands, for the sake of the knowledge and the confidence gained.

In the grammar grades it is unsatisfactory trying to supervise two manual training classes in one room, at the same time. That is—to conduct a large sewing class of girls and one of boys in basketry or in cardboard construction. We hope that some time, not far off, the boys will have a well-equipped work shop and the girls an ideal sewing room.

The work in the high school varies most from that of last year. The class, being composed largely of girls, was divided for the first term. The boys were given a short elementary course in freehand working drawings, while the girls took designing. Designs for belts, bags, table runners, pen wipers and desk sets were made and applied. This term the class is working on freehand object drawing;

not a single book, a list of papers. The work in this class has been enormous, considering the conditions under which it has been carried, but results of a high grade can be obtained in a year, so that these pupils are obliged to do so.

Respectfully submitted,

GRACE H. HOLMAN.
